

## Peoria County DFIRM Mapping Project Communications Assessment

FEMA has very specific requirements for communicating information regarding changes to the regulatory Flood Insurance Study and Maps. Specifically Federal Register Notices, Public Notices in newspapers, certified mailings to Community Executive Officers, and the resolution of comments and appeals. However, we want to augment that process with additional communication venues to provide digital data, and to reach a broader audience.

FEMA and the ISWS will work together to establish a consistent flow of information about the project timeline, status, and next steps. As part of the outreach process the Illinois State Water Survey will notify you of any meetings or other important information concerning the Peoria County mapping project in which you might be interested. In order to best serve your needs for this outreach we would like for you to answer a couple questions that will help us determine the best way to correspond with your community. Please respond to the questions by circling the best answer.

Community \_\_\_\_\_ Name \_\_\_\_\_

1. What do you believe would be the best way to make information developed through this flood risk mapping project available to all community officials?

a. Providing a URL link to a website

b. CD or DVD sent via mail

c. Other (please list/describe) \_\_\_\_\_
